Age 35

Married, no children

Masters in
Applied Behavior Analysis

Background Story

Meet Byron Jiménez, a dedicated Applied Behavior Analysis (ABA) Center Facilitator with a passion for making a positive impact on the lives of children with autism. At 35, Byron has spent over eight years honing his skills in ABA therapy, transforming his commitment to behavioral interventions into a rewarding career. ➤ The challenge of acquiring high-quality learning materials, supplies, and furniture designed specifically for ABA therapy has led Byron to explore various options. Despite not being tailored explicitly for ABA therapy, the quality and versatility of Lakeshore products make them appealing for customization to meet the unique needs of his young learners.

Needs & Goals

- ☆ Byron requires high-quality, specialized learning products to address the needs of each child in the ABA facility.
- ☆ He needs furniture that is both functional and comfortable, creating a conducive environment for ABA therapy sessions and ensuring the safety and well-being of the children.
- ☆ Byron values a streamlined online ordering process to quickly replenish supplies, enabling smooth operations and minimizing disruptions to therapy sessions.

Frustrations

- ☹ Dealing with limited options for high-quality, specialized learning materials hampers Byron's ability to provide diverse and effective therapy approaches.
- ☹ Inappropriate or uncomfortable furniture in the therapy space frustrates Byron and can negatively impact the focus and engagement of the children during sessions.
- ☹ Delayed deliveries creates challenges in maintaining consistency and effectiveness in ABA therapy programs.

Behaviors

- 📖 Byron engages in thorough online research, reading reviews and consulting colleagues, to ensure the learning materials and supplies he selects meet the rigorous standards required for ABA interventions.
- 📖 He strategically budgets for ABA center supplies, seeking cost-effective options without compromising on the quality and efficacy of materials used in therapy sessions.
- 📖 Byron assesses learning materials and supplies, identifying and replacing items as needed to ensure a well-equipped and functional therapy environment.

“The joy of making a positive impact on a child's life, helping them navigate the world with increased skills and confidence through ABA interventions, is the most gratifying aspect of my role as a facilitator.”
